

Business Presentation

1. Business Problem

Users could postpone identity verification, creating onboarding friction and abandonment.

2. Objectives

Increase immediate document submission, improve approval conversion and reduce support contacts.

3. Dataset

100,000 synthetic users, 500k+ product events and support interactions.

4. Analysis

EDA, Funnel, Segmentation, Statistical Testing, A/B Test and Financial Simulation.

5. Recommendation

Redesign the document submission step and validate with controlled experimentation.

6. Expected Impact

Higher approval rate, lower support costs and improved customer experience.
